SEDC is working with Utah Valley University and USBE to provide an Elementary Math Endorsement program for teachers across Utah. These classes will be taught utilizing Zoom Video Conferencing and Canvas, so no travel is necessary. Participation in synchronous Zoom meetings once a week is required. All licensed educators are welcome to register for this USBE approved endorsement program. The program is designed for currently licensed elementary teachers that want to improve their math content and pedagogy skills.

There are six required courses for this endorsement. A single textbook is utilized for the entire endorsement. There is a \$210 course fee for each course payable to SEDC. Teachers must also register with UVU and pay the \$45 transcript fee. Courses are offered consecutively and teachers may join the cohort at any time. It is anticipated that participants will complete the coursework and competencies for this endorsement in 24 months.
